### COMMENTS FROM THE TOWN MANAGER'S OFFICE

At the last meeting of the Board of Selectmen it was voted to purchase a plow frame for the 1959 International truck. As the 1956 and 1958 trucks are already equipped, we will now have the three two-ton trucks with full hydraulic equipment for operating the wing and plow. The plow frame will be purchased on a time payment plan, to be paid for during 1960, with no carrying charges. Payments will be made from the truck rental account.

Inquiry was made as to whether the 1952 Cat tractor is for sale. The Selectmen authorized the Town Manager to sell the tractor and plow if a reasonable offer was forthcoming.

Warrants will be posted in a few days for the Special Election to act on five referendum questions that are being submitted to the voters by the Legislature. The election will be held on Monday, Oct. 12, the polls opening at 10:00 a. m. and closing at 7:00 p. m.

The test sample that was taken from the well in front of Chadbourne's barn at West Bethel has proved unsatisfactory according to the reports received from the Division of Sanitary Engineering. A well point is to be driven at the rear of the West Bethel school on land of Herman Bennett to see if a sample can be obtained that will pass inspection.

Sincerely,  
Harold L. Bean

## MAINE APPLE PRODUCTION GOING UP

It looks like Maine orchards will continue to produce more and more apples each year for at least the next 10 years. That's the word from Rudolph A. Poray, Extension Service fruit specialist, University of Maine. Unfortunately for consumers, this doesn't mean that apples will become cheaper. Actually, they may get a little more expensive. This is partly because the demand for higher quality apples outside of New England has provided an expanded outlet for apples grown under the favorable Maine climate, says Poray. About 50 percent of Maine's apple crop is shipped out of state. Another 14 percent is processed into applesauce, pies, mince, juice, cider and preserves. This leaves only 27 percent of Maine's apple crop for our consumers. This just isn't enough fresh apples for local consumption.

Harold Symon has completed his duties as summer pastor of Newry and Upton. He will resume his studies at Harvard Divinity School.

When I consider Thy heavens... the moon and the stars which thou hast ordained; What is man that Thou art mindful of him?

How almost unbelievable—but how wonderful—it is that Almighty God, Creator of all the vast universe, should nonetheless in infinite loving kindness have heed of even the least of us mortals!

## NEWSPAPERS AND TV

Last year was a very bad year in the U. S. automobile industry. Sales were far below past and anticipated levels. There was but one exception — American Motors, with its Rambler, whose sales zoomed an astonishing 80%.

So something reported by Editor & Publisher in a late issue is of great interest.

The television people claim the world for their advertising medium. But American Motors, in setting its 1958 record, spent more than two-thirds of its \$6 million advertising budget in newspapers, and absolutely nothing on TV.

The other makes all spent large parts of their ad budgets on TV.

Editor & Publisher says: "It will be argued, of course, that 1958 was an unusual year, that too many other factors enter into automobile sales, and that these figures are meaningless. We disagree.

"It seems to us that the coincidence — the manufacturer placing the largest percentage of his advertising appropriation in television and having the largest percentage drop in sales together with the fact that the only manufacturer who spent no money in TV but had the only increase in sales — is too great to ignore."

TV is a great medium but nothing can supplant the newspaper.

## FARMERS' RATE REQUESTS FOR SOIL BANK DUE

Maine farmers interested in putting land in the Conservation Reserve program of the Soil Bank must file their requests for a determination of the basic rate for their land between August 24 and September 10. Forms may be obtained at county offices of Agricultural Stabilization and Conservation. Maine's goal is 23,000 acres of cropland to be set aside under the 1960 Conservation Reserve.
